

State and Local Sales Tax Rates

Fiscal Year 2026 — Rates in effect as of January 1, 2026 | Fiscal Research Note No. 131

The table reports the general statewide sales tax rate together with a population-weighted average of local rates levied within each state. **All rates are expressed as percentages.** A long dash indicates that no tax of the relevant type is imposed. Local rates are weighted by ZIP-code level population and may change more frequently than statewide rates.

Notes: The combined rate is the arithmetic sum of the statewide rate and the population-weighted average local rate. Rank is assigned on the combined rate, highest to lowest; states imposing no sales tax are ranked last. A negative average local rate reflects a statutory rebate applied in certain designated urban enterprise zones. Rates applicable to groceries, prepared food, motor vehicles and lodging may differ from the general rate and are not reported here.
